ONE MOUNTAIN, ONE TERROIR, ONE ESTATE, ONE HISTORY

**IN 2019 CHÂTEAU GASSIER REINFORCES ITS POSITION IN THE GASTRONOMY AND SOMMELLERIE SECTORS, LAUNCHING ITS NEW LIMITED PRODUCTION PRESTIGE CUVÉE.**

Château Gassier, a well-known estate in Provence Sainte-Victoire, is highlighting its strongest attributes. The launch of Elevae will help the estate to strengthen its reputation as a reference point in gastronomic rosés thanks to two cuvées: **946** and **Elevae**.

**Elevae is aged for 24 months in 100% Austrian oak barrels and made only in the most outstanding vintages.**

This cuvée is produced in limited quantities of just 1500 numbered bottles originating from a parcel selection in the heart of Château Gassier's 40 hectares of organically grown vines. The Sainte-Victoire's microclimate and outstanding terroir have enabled our teams to produce this gastronomic rosé with an ageing potential of several years.

*"2016 has been an excellent year both for ripeness and high aromatic potential of berries. We wanted to make a new cuvee able to reveal and disclose the best of Saint-Victoire terroir. 2016 has been the first vintage revealing its best charms. The outcome: a well-structured gourmet rosé, with an interesting aromatic complexity. It opens surprising doors to food pairings."*

**Elevae** - Côtes de Provence Saint-Victoire, 2016  
Sold in **individual presentation boxes** or in **3-bottle wooden cases**  
RRP : 100\$, available in restaurants and wine merchants

## CHÂTEAU GASSIER

Château Gassier is in the heart of Cru Sainte Victoire within the Côtes de Provence appellation.

40 hectares of organic vineyards are circled to the North by Mount Sainte Victoire, to the South by the Sainte Baume massif and to the East by Mount Auréliens, which all act as a shield, lovingly protecting the vineyard. At less than 30 kilometers from the Mediterranean Sea, the climate in the valley is semi-continental, ideal for winegrowing and perfect for such grape varieties as Grenache, Cinsault or Vermentino. Château Gassier, after shifting to a plot selection technique, produces fine rosé wines which are the perfect partners for gastronomy.
